DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hostetler '429.

Hostetler teaches a mounting bracket for suspending a support member and a pressure regulator in a poultry house. More specifically, the apparatus of Hostetler includes a first and second member (103) being sized and shaped to define a passage within which a support member is received, as seen in Figure 9. A cable 120 or support pipe is operatively connected to at least one of said first and second wall members at one end and connected to a support structure of said poultry house at another end. Fasteners can extend through the base to connect said regulator to said bracket. Lower members adjacent positioned to element 14 are considered to be an arm that extends from each sidewall. As for claim 5, the device of Hostetler can be made from a variety of materials and techniques.

Conclusion

Summary: Claims 1-6 are rejected.
